Brief profil

Open-minded, curious, motivated, team player, enjoy familiarising myself with new things

I took my first steps in programming at 'Motognosis GmbH', where I was involved in the development and research of software solutions for medical products.

I am currently completing further training to become a full-stack web developer at the DCI, where I am working intensively with HTML, CSS (SASS), JavaScript and MERN-Stack. I will complete this in August after a two-month internship.

Languages

German - Native
