Brief profil

Open-minded, curious, motivated and a team player—I enjoy learning about new technologies.

I took my first steps in programming at Motognosis GmbH, where I helped develop software solutions for medical devices.

I just completed my further training as a full-stack web developer at DCI, focusing on HTML, CSS (SASS), JavaScript, and the MERN stack.

As part of my two-month internship at Flavia, I worked in an agile Scrum team with a focus on Angular, TypeScript, OpenAPI, PostgreSQL and Docker.
